WEATHER OF CONCERN

Weather of Concern

- The National Weather Service has issued a High Wind Warning for portions of Southern California mountainous and valley locations from Sunday morning through Monday morning.
 - Strong gusty winds and blowing dust will produce hazardous driving conditions.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

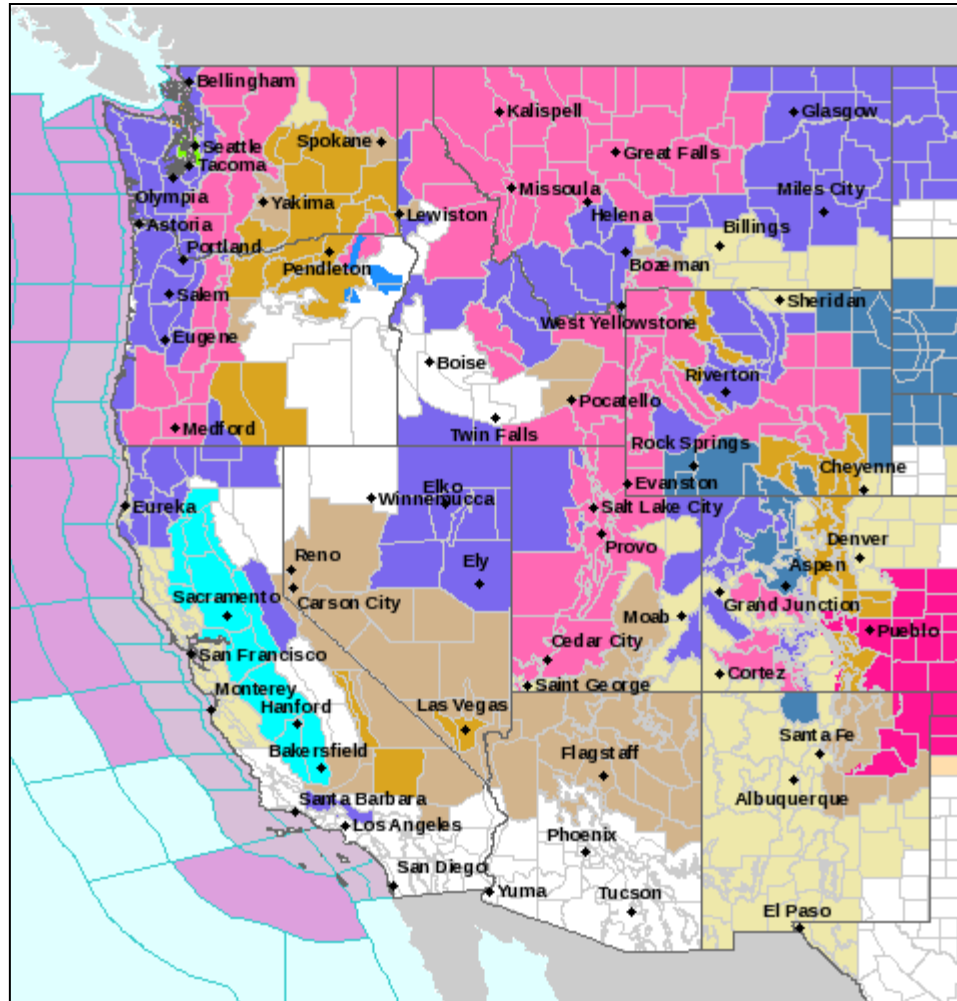

A cold front will move into the area Saturday bringing precipitation mainly along the Cascades. A much colder air mass will follow the front tonight through tomorrow. Snow levels this afternoon will start out around 5000 feet, then will quickly lower to around 2000 feet east of the Cascades and 1300 feet west of the Cascades by early tomorrow morning. Most of the accumulating snow is expected from tonight through tomorrow night. Additional accumulations are expected tomorrow night into Monday morning, but amounts will be less. Snowfall accumulations will be highest along the Cascades from around highway 140 north. This includes Highway's 230 and 138 near Diamond Lake and highway 62 near Crater Lake. Mount Ashland will get less snow than the Cascades (3-6 inches). The mountain passes along interstate 5 between Grants Pass and Canyonville and Siskiyou Summit could also pick up 3-6 inches. There is also concern for snow down to the valley floors, this includes the Rogue and Illinois Valley's and Umpqua Basin. These areas could get 1-2 inches, especially after dark Sunday night if snow showers linger for a longer period of time. Confidence on snow amounts in the lower valleys are low, so stay tuned for the latest forecast.

SOUTHERN CALIFORNIA

There is a chance of light showers across Los Angeles County with light snow across the northern slopes of the Los Angeles, Ventura County Mountains and the San Gabriel Mountains tomorrow night through Monday morning. Not much precipitation expected with this quick moving system. Gusty winds will also be on the increase. Initially southwest winds will increase across the Antelope Valley on Sunday, then winds will become more widespread late Sunday night into Monday as they shift to the northwest to north. Wind advisories could be needed for this event. Blowing light snow and icy driving conditions will be the main concern Sunday night through Monday, especially across the northern Ventura County Mountains slopes near the Grapevine. By Monday night, winds will begin to diminish some and even colder air will filter into the region. Freeze Watches could be needed for the Central Coast, Santa Barbara South Coast, Santa Ynez Valley as well as the Ventura and Los Angeles County Valleys Monday night and possibly once again Tuesday night.
